

Apex Town Campus Apex, North Carolina

Project Summary

This project involved a New Campus with 2 free standing structures, an Administration Building and Community Center. The office area was designed with a large atrium area in the center of the building to include a town meeting room. The community center consisted of a new gym, fitness areas and recreation room for children. Both structures were structural steel framed with brick veneer façade and windows and canopies were designed to create the historic look of the town.
