

# N.C. Farm Bureau Administrative Office Building

Raleigh, North Carolina

## Project Summary

This four-story facility is a cast-in-place concrete structure with precast wall panels and glass curtain-wall systems. The interesting feature about this project is that there are extensive areas of formed, panned concrete ceilings that remained exposed throughout the structure and this architectural concrete required extensive care and quality. This project was completed in approximately 15 months.

**Size** 70,000 SF

**Owner** Farm Bureau
